## Bachelor of Science in Health Information Management

As one of the fastest growing job markets in the country, the healthcare industry is experiencing an increased demand for qualified professionals to lead and manage health care information systems. The Bureau of Labor Statistics cites health information as one of the 20 fastest growing occupations in the United States. As a result, demand for health information management professionals is expected to increase by 21 percent through 2020,<sup>1</sup> creating up to 12,000 to 50,000 new jobs.<sup>2</sup>

Health Information Management was recently named the #4 best new major in an article by *U.S. News & World Report*.<sup>3</sup> As demand continues to flourish, there has never been a more opportune time to pursue a Bachelor of Science in Health Information Management. This diverse degree path combines medicine, management, finance, and information technology to equip students with the skills to successfully manage a variety of health care information systems.

### The Value of a Bachelor's Degree

In today's changing job market, the bachelor's degree is swiftly becoming the standard credential requirement for professional employment. During competitive economic times, a bachelor's degree holds consistent value and continually opens the door to a greater number of proven job opportunities.

As the healthcare industry continues to grow, the United States Department of Labor predicts that new job opportunities for health information specialists will develop, including innovative positions in mobile support, public health informatics, implementation support, and information management redesign.<sup>2</sup>

By pursuing your Bachelor of Science in Health Information Management today, you can secure your position as a qualified candidate and prepare yourself for future opportunities in this expanding market.
